

## Podcasts

To access the Bill Rudge Ministries podcasts you will need Apple's iTunes music player. To set them up to auto download you must click [here](#) (which should open the Apple iTunes Music Store, and automatically direct it to the Bill Rudge Ministries podcast page), and then click "subscribe" to have the podcast delivered when new recordings are available.

If you clicked the link, and you got an error, or iTunes didn't open then open iTunes manually (there is usually an icon on the desktop of your Windows PC or in the dock if you are using a Mac); click on "iTunes Store" in the left hand column of the player. Once the music store loads type "Bill Rudge" into the search bar at the top right hand corner of the window, and press enter. In the results you should find the podcast. Click "subscribe" to have the podcast delivered when new recordings are available.

If you would like to use a player other than iTunes you will need to read the instructions for setting up a podcast, and when it prompts you to put in the XML page address enter
